## Accepts S&C Live Parts

### ELRIM Cycloaliphatic Epoxy Provides:

- Nontracking, self-scouring, nonweathering performance
- Superior dielectric strength, dielectric loss and power factor
- Choice of shapes allows design innovation
- Mechanical and thermal toughness
- Shatter free arc flashover performance
- Oil resistant

### Elliott Design Provides:

- Cast-in-place inserts without metal end caps
- Contamination resistant Elliott square edge skirts
- Generous dry arcing (strike) distance
- Increased creep distance to resist contamination
- Thermal cycling withstand from +200° F to -200° F
- High strength - field proven performance
- Experience with cycloaliphatic epoxy since 1975

Special bolt series apparatus insulators provide bolt locations spaced to accept S&C live parts and may be used to construct fuse mountings and other apparatus that would otherwise require S&C insulators. These insulators may be mounted in any position. The unique Elliott square edge skirt design provides unusually high performance in contaminated conditions - wet or dry. High cantilever strength and the other superior qualities of cycloaliphatic epoxy make this insulator a high-performance component.

### Important:

*Water that accumulates in the inserts and then freezes will damage epoxy insulators. When insulators are to be installed outdoors, inserts must be partially filled with no-oxide compound (or similar material) to prevent moisture accumulation in the inserts.*

### Ratings and Dimensions of Apparatus Insulators

Catalog Number	S&C Replacement	Nominal Voltage kV	Withstand Test Voltage Kilovolts			Height Inches	Minimum Leakage Inches	Minimum Strike Inches
			Impulse 1.2 x 50	One Min. Dry.	10 Sec. Dew			
2201-206.25	PA-7227	15	95	50	30	6.25	14.375	6.25

Insert Thread Size	0.375"-16	0.375"-16
Net Weight, Pounds (kg)	4.3 (1.9)	4.3 (1.9)

\* To attain their rated cantilever strengths, insulators must be mounted on a flat surface that is at least as wide as the diameter of the base of the insulator. Furthermore, the mounting surface must be free of protrusions, such as lumps from galvanizing, to prevent cracking of the insulator when mounting bolts are tightened.
